

We have to fill these out. Describe illness or injury?

I dislocated my shoulder.

All right. And how did the accident occur?

You already know that.

Cause of accident, lack of adhesive ducks. Okay, medical history. Have you ever been diagnosed with diabetes?

No.

Kidney disease?

No.

Migraines?

Getting one.

Are you currently pregnant?

No.

Are you sure? You look a bit puffy.

Change migraine to yes.

When was your last menstrual period?

Oh, next question.

I'll put, in progress. Okay, moving to psychiatric disorders, list all major behavioural diagnoses, e.g. depression, anxiety, etcetera.

Oh, my god, what the hell does this have to do with my stupid shoulder?

Episodes of sub psychotic rage.

Ass.

Possible Tourette's. Alright, moles, lesions or other skin conditions. Soup tattoo on right buttock.

Hey, Sheldon, Sheldon, look, I am scared and in a lot of pain. Could you please just take a break from being you for just a minute and try being, I don't know, comforting?

I'm sorry. There, there. Everything's going to be fine. Sheldon's here.

Thanks. That's much better.
